GROSS MARGIN CONTINUES TO IMPROVE IN Q1, WHILE RESULT IS UNDER PRESSURE DUE TO LOWER SALES

- Our growth in loss prevention solutions continues, also improving our gross margin, driven by our technology leadership in this segment as well as a favourable market outlook
- Adjusted EBIT somewhat behind last year, negatively impacted by lower volumes and cost from our participation at Euroshop. Reported EBIT of MSEK 70 (86), have had a positive development in recent quarters as we completed the restructuring phase of our transformation in Q2 last year

MAIN TAKEAWAYS FROM THE Q1 REPORT 2023

- ▶ The indications of a downturn seen in the fourth quarter of 2022 negatively impacted sales – currency adjusted sales decreased by 15 percent
- ▶ Lower sales impacted our earnings performance, which could not be fully offset by our relatively strong gross margin (through implemented price increases and a beneficial product mix)
- ▶ Our unique and customer-adapted solutions in loss and theft prevention, increased operational efficiency and reduced energy consumption continue to attract interest among retailers – not least after the EuroShop retail fair 2023
- ▶ Efforts to reduce the working capital requirements continue to have a positive impact on cash flow for the Group
